**BD 530**

**BR 530**

**BR 53/40**

**BR 530 ELECTRIC**

**BD 530 ELECTRIC**

Versatile and economical, compact, powerful and extremely maneuverable.

**BR SERIES -  
BR 530 / BR 53/40**

Introducing cylindrical brush automatic scrubbing from the innovative leader: 1500 rpm brush speed and concentrated brush pressure allow not only daily maintenance and basic cleaning, but deep scrubbing and polishing as well. The units combine a 34" squeegee, 10.5 gallon tanks, and an easy-to-use control panel.

The BR 530 has an 18" cleaning path, while the BR 53/40 model has a 21" cleaning path for larger facilities and high traffic areas where more frequent scrubbing is necessary.

**BD SERIES - BD530**

This 200 rpm unit uses traditional rotary brushes or pads and offers all the features that users of automatic scrubbers demand: rugged design, ease of maintenance, and efficient performance.

Like the BR units, the BD 530 has a 34" squeegee, 10.5 gallon solution and recovery tanks, and an easy-to-use control panel. A compact tank-in-tank design, quick squeegee and brush change, and a dead man's lever are among the many features of these smartly designed units.

**ELECTRIC-POWERED  
BR 530 AND BD 530**

Available in electric-powered units, the BR 530 Electric and BD 530 Electric offer battery-free autoscrubbing, continuous operation and the elimination of battery maintenance.

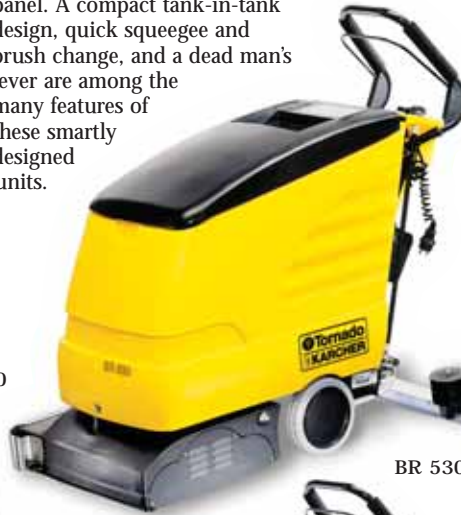

The BR 530 Electric features 1000 rpm brush speed, a 34" squeegee, 10.5 gallon tanks, and an easy-to-use control panel.

The 200 rpm BD 530 Electric uses traditional rotary brushes or pads and has a 34" squeegee, 10.5 gallon solution and recovery tanks, and an easy-to-use control panel. A compact tank-in-tank design, quick squeegee and brush change, and a dead man's lever are among the many features of these smartly designed units.

**Continuous operation**  
These electric-powered units eliminate battery charging and allow the operator to scrub without lengthy interruptions.

**Disc brushes**

The BD 530 can be fitted with a variety of optional scrub brushes - a time-proven solution for smooth floors.

**Disc pads**

The BD 530 is equipped standard with an 18" pad holder. When used with the appropriate pad, this is the ideal solution to daily maintenance cleaning.

**Cylindrical brushes**

The BR units come standard with black brushes for daily cleaning operations. A variety of brushes are available for high performance on structured flooring.

**Cylindrical pads**

The BR units can be fitted with a unique roller shaft that accepts individual pads. Each pad can be changed if damaged without the need to replace an entire single pad.

**Tank-in-tank system**

This design has allowed for more compact dimensions for easier maneuverability and storage. High-impact, corrosion-free tanks protect the batteries and motors from moisture.

**Service-friendly complete package**

All battery-operated units in the 530 Series come complete with batteries and charger, and curved squeegee. All assemblies are easily accessible, and the cover is fully opened in a single step.

**The BD 530 - traditional cleaning with disc brushes**  
A brush speed of 200 rpm produces brilliant results in daily maintenance cleaning.

**Innovative cleaning with roller brushes**  
With brush speed of 1500 rpm, the BR 530 and the BR 53/40 offer an advantage on structured surfaces such as rubber disc flooring.

\*1000 rpm for electric unit

**Standard or Deluxe?**

The BR 530 is also available in an extra large model called the BR 53/40, with an increased cleaning path, power, and hourly scrubbing performance.

**Operation and controls**

The control panel is sensibly arranged for hassle-free operation. An important safety feature is the "dead man's lever" that prevents operation without the operator present.

**Brush relief**

When the machine is not in use the brush head can be raised off the floor, eliminating bristle damage and wear.

**Low profile head**

Low profile scrubbing heads make cleaning easier under shelves, fixtures, and furniture.

**Quick change system for brushes**

Both the BD and BR allow speedy, trouble-free brush replacement without the need for tools.
