

A better way to clean.

The BR and BD 40/25.

Tight space?
Tight budget?
Exceptional scrubber.

Manageable.

A walk-behind automatic scrubber is one of the most productive tools used in cleaning. Case in point, the battery-powered BD and BR 40/25.

These units, one in a disc version (BD) and the other incorporating cylindrical brush technology (BR), have a scrubbing width of just 16" and a compact length of 31.5", making them incredibly maneuverable. With these dimensions, the units can more efficiently clean where other scrubbers can't, and they can do it more easily.

Hard working.

Enhanced productivity becomes the featured attraction with 6.5-gallon solution and recovery tanks that provide for substantial run-time. Easy-on/easy-off, spring loaded brushes are installed in the exact same "can't miss" method as the popular Vario floor machine. As a result, there is more time to spend scrubbing and less time spent preparing to do so. Again...more productivity.

An easy choice.

Add to all this an easy-to-use dial on the front panel that controls all functions, a foot operated front caster that is used to add mobility to the unit for transportation purposes, a corrosion-free frame and a folding handle for easy storage. The 40/25 is also one of the few units in the world to incorporate injection molded plastic, the best kind to use for the most precise fit and finish.

When all is said and done, the productivity-enhancing BD and BR 40/25 automatic scrubbers are the ones to use when you need quality cleaning machines in tight surroundings.

And it's only from Tornado.

The new BR and BD 40/25. Trim and compact can indeed get the job done.

BR 40/25

BD 40/25

The 40/25 has an incredibly small footprint at just 31.5" long and 22.5" wide, making for tremendous maneuverability and increased productivity.

Easy to control

One dial on the front panel controls all operations functions. It couldn't be any easier!

Easy to transport

A foot-operated front caster aids in the transporting of the 40/25.

Easy to adjust

Installation and removal of the spring-loaded BR version brushes is simple (no tools required) and takes just seconds.

Easy to store

The push handle folds down, making an extremely compact unit even more so.
