

Value, performance, and one of the industry's most popular walk-behind scrubbers

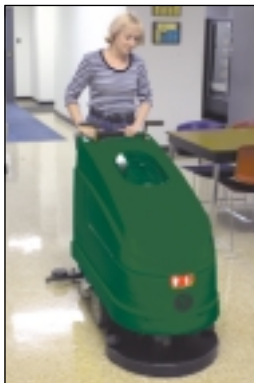

The Profi™ is perfect for a wide range of flooring services from tile, linoleum and rubberized surfaces to marble and concrete. Ruggedly constructed of rotationally-molded plastic, wrapped around a heavy-gauge steel base, these machines are a fundamental component in any hard-floor maintenance program. In a single pass, the Profi™ lays down solution, scrubs, and recovers dirty water, leaving a clean, dry floor behind. These units are in use worldwide in retail store chains, grocery stores, and discount stores. Thanks to their quiet operation, compact size, and front-mounted warning light, they can be used in retail settings while customers are shopping.

We use an oversized 1HP brush motor, twice the size of competitive units, to ensure years of trouble-free, heavy-duty scrubbing. Chose the PF9205 for many years of exceptional facility maintenance.

COMMON SENSE FEATURES

A see-through lid on the recovery tank allows the operator to monitor recovery tank level for optimal machine performance.

PROFESSIONAL PERFORMANCE

The Profi™ leaves behind a clean, dry floor. Easy-to-use controls make the unit an operator favorite the world over.

SERVICE MADE SIMPLE

The battery compartment is easily accessible for maintenance and service operations by qualified personnel.

PRODUCT SPECIFICATIONS	
MODEL	PF9205
CATALOG NUMBER	69205
